Proceedings of SPIE 0277-786X, V. 9686

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOMATT 2016: Optoelectronic Materials and Devices, edited by Yadong Jiang, Bernard Kippelen, Junsheng Yu,
Proc. of SPIE Vol. 9686, 968601 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2262711

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ORAL SESSION

9686 02	Imaging technique based on multilinear array integrated TDICCD [9686-5]
9686 03	THz transmittance and electrical properties of silicon doped vanadium dioxide films tuning by annealing temperature [9686-38]
9686 04	Research of timing design and adjusting methods of EMCCD [9686-4]
9686 05	A deformable plane-parallel optical plate with 16 actuated points for low order aberrations correction [9686-12]
9686 06	Optimizing design method of static simulation for Unimorph DM [9686-56]
9686 07	A novel CPPM anti-crosstalk collision avoidance lidar with ultra-low laser power [9686-7]
9686 08	High performance organic optoelectronic integrated device based on thermally activated delayed fluorescence material with an interlaid architecture [9686-52]
9686 09	Simulation of GaN/InGaN avalanche phototransistors [9686-27]
9686 0A	PSPICE simulation of transient characteristics of GaN based MSM structure UV detector grown by MBE [9686-61]
9686 0B	Waveguide effect of Fe doped GaN alloy grown by MOCVD [9686-63]
9686 0C	Facile solution processed MoO₃ thin film as hole transportation layer for polymer solar cells [9686-18]
9686 0E	The ambipolar operation of lateral and vertical PbSe quantum dots field effect phototransistors [9686-20]

POSTER SESSION

- 9686 OF **Quality assessment for spectral imaging** [9686-1]
- 9686 OG **Technique of multilayer to improve holographic performance of photopolymer for high density data memory** [9686-3]
- 9686 OH **Detection and extraction of mixed signals in hybrid optical fiber sensing system** [9686-37]
- 9686 OI **Third-order optical nonlinearities of TiO₂/PS composite system** [9686-24]
- 9686 OJ **Influence of annealing treatment on the dielectric properties of poly(vinylidene fluoride)** [9686-32]
- 9686 OK **Improved single image super-resolution based on edge directed interpolation** [9686-14]
- 9686 OL **Effect of the introduction of Ag on the microstructures and electrical properties of polycrystalline VO₂ thin films** [9686-31]
- 9686 OM **Optical properties of thermally evaporated ultra-thin Al, Ag and Cu films** [9686-22]
- 9686 ON **Fabrication and parameters calculation of terahertz detector with resonance cavity structure** [9686-39]
- 9686 OO **Image metric analysis of laser jamming effect based on edge strength similarity and gray mean square error** [9686-43]
- 9686 OP **Surface modification on GaAs by *in-situ* pulsed UV laser** [9686-35]
- 9686 OQ **Synthesis and structure property relationship of several dicyanomethylene malononitrile derivatives** [9686-15]
- 9686 OS **A room temperature terahertz photodetector based on In_{0.53}Ga_{0.47}As material** [9686-58]
- 9686 OT **The study on the generation method of two-dimensional airy beams based on digital blazed grating** [9686-47]
- 9686 OU **DFB fiber laser hydrophone enhanced through polyurethane end surface pulling** [9686-34]
- 9686 OV **Performance of terahertz photodetectors based on MSM structures of Mercury-Cadmium-Telluride under low temperature** [9686-60]
- 9686 OW **Scratch detection in metal surface by blasting using Gabor filters** [9686-44]
- 9686 OX **Magnetically tunable giant Goos-Hänchen shift of reflected terahertz beam** [9686-9]
- 9686 OY **Fabrication and infrared absorption of tellurium doped silicon via femtosecond laser irradiation** [9686-21]
- 9686 OZ **The new high-speed switching study of ultra-short laser pulse technology** [9686-25]

- 9686 10 **Realizing white organic light emitting device with direct hole injection structure by manipulating electron transport** [9686-2]
- 9686 11 **Synthesis and characterization of lithium tantalate thin films fabricated by sol-gel method** [9686-41]
- 9686 12 **Effects of annealing time on the application of vanadium dioxide films in smart windows** [9686-40]
- 9686 13 **Simulation and analysis of image sensor's TEC cooling package based on ANSYS Icepak** [9686-36]
- 9686 14 **A bidirectional image matching algorithm based on SIFT features** [9686-68]
- 9686 15 **The method of color restoration based on CYMG complementary colors CFA pattern** [9686-30]
- 9686 16 **An automatic white balance method based on gray world and coincidence of chromaticity histogram** [9686-29]
- 9686 17 **Light field microscope with square aperture and the reconstruction algorithm** [9686-45]
- 9686 18 **Measurement of scattering laser energy density distribution in optical extinctive chambers based on CCD imaging method** [9686-19]
- 9686 19 **Thermal strain and stress distribution of ZnTe/Si(211) and CdTe/Si(211) heterostructures** [9686-17]
- 9686 1A **An efficient algorithm based on the fast fuzzy theory for image and video dehazing** [9686-28]
- 9686 1B **Effect of doping copper-phthalocyanine and annealing treatment on the performance of polymer solar cells** [9686-53]
- 9686 1C **The effect of interlayer on the performance of double emitting layer OLEDs** [9686-46]
- 9686 1D **Theoretical investigation of a novel logic device based on plasmon-induced transparency** [9686-49]
- 9686 1E **A general crosstalk noise analysis model for the N-port nonblocking optical router in ONoC using WDM** [9686-50]
- 9686 1F **An optofluidic variable optical attenuator based on magnetohydrodynamic drive** [9686-54]
- 9686 1G **A research on high-speed and large-capacity interface technology basing on fiber channel** [9686-59]
- 9686 1H **Porous silicon biosensor for Echinococcosis detection based on fluorescence spectroscopy** [9686-55]
- 9686 1I **A biosensor platform based on Raman spectroscopy of porous silicon** [9686-57]

- 9686 1J **Detection of terahertz radiation using improved uncooled focal plane array detector** [9686-26]
- 9686 1K **Design and analysis of polarization splitter based on dual-core photonic crystal fiber** [9686-13]
- 9686 1L **A novel method to real-time offset correction for frame transfer CCD** [9686-23]
- 9686 1M **Controllable preparation and optical properties of Ag columnar thin films** [9686-10]
- 9686 1N **Research on method for improving depth of focus with Gaussian beam by super-resolving pupil filters** [9686-65]
- 9686 1O **Ti-doped hematite photoanode prepared by spray pyrolysis method with enhanced photoelectrochemical performance** [9686-16]
- 9686 1P **Large area vertical Ag columnar thin films as highly sensitive SERS substrates** [9686-11]
- 9686 1Q **Low-voltage organic thin film transistors with solution processed hafnium oxide and polymer dielectrics** [9686-33]
- 9686 1S **64-element fiber laser sensing system with interferometric interrogation** [9686-42]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Jingchi Yu, *Co-chair*, Soochow University (China)

Symposium General Secretary

Li Yang, Committee of Optical Manufacturing Technology COS (China)

Introduction

The 8th International Symposium on Advanced Optical Manufacturing and Testing Technology (AOMATT 2016) was held 26–29 April 2016 at the Suzhou International Conference Center, Suzhou, China. The symposium was opened in the morning of 26th April with a formal opening ceremony. The ceremony started with the introduction of VIP guests, symposium chairs, conference chairs, and plenary speakers. Professor Liwei Zhou AOMATT 2016 Symposium Chairman, Professor Bin Xu Vice President of Institute of Optics and Electronics (China), one of the sponsors of AOMATT 2016, and Professor Yuan Yinnan, Vice President of Soochow University (China) gave opening speeches to a packed auditorium.

Plenary sessions followed immediately after the conclusion of the opening ceremony. There were a total of eight plenary presentations: "Less is more: extreme optics with zero refractive index physics", by Dr. Eric Mazur, Balkanski Professor of Physics and Dean of Applied Physics at Harvard University (United States); "Large optical telescopes in the era of large wide-field survey", by Dr. David R. Silva, Director of United States National Optical Astronomy Observatory (United States); "The European Extremely Large Telescope (E-ELT) revolution is under construction", by Dr. Marc Cayrel, European Southern Observatory (ESO) Project Manager, E-ELT Optomechanics (Germany); "Ultra-precision lens fabrication via molding: advances and challenges", by Dr. Liangchi Zhang, Professorial Fellow of Australian, Head of the Laboratory for Precision and Nano Processing Technologies, The University of New South Wales (Australia); "Advancing ultra-precision machining to high performance", by Dr. Ing. Oltmann Riemer, Head of the Laboratory for Precision Machining, Universität of Bremen (Germany); "Micro/nano-optics for flexible functional devices: today and future", by Dr. Linsen Chen, Chief of National United Engineering Research Center of Digital Optical Imaging and Display, Soochow University (China); "New angles on angle metrology: approaching fundamental limits", by Dr. Ralf D. Geckeler, Head of Length and Angle Graduations Group, Physikalisch-Technische Bundesanstalt (Germany); and "Functional photonic nanostructures: from thin films and slits to catenaries", by Dr. Xiangang Luo, Director of State Key Laboratory of Optical Technologies for Nano-Fabrication and Micro-Engineering, Chinese Academy of Sciences (China).

More than 800 people attended the opening ceremony and full-day plenary sessions. More than 1,000 abstracts were submitted to AOMATT 2016. About 500 submissions were selected for oral and poster presentations after careful reviews by conference chairs and committee members. Oral papers were presented in eight parallel conference sessions 27 and 28 April. An all-symposium poster session was held in the afternoon of 28 April. Many papers highlighted cutting edge research and development in optical design, manufacturing, and testing. Authors and attendees had very productive discussions and exchanged ideas throughout the symposium.

The AOMATT 2016 organizing committee would like to express their sincere appreciation for the strong support of SPIE, technical co-sponsor and long-term partner of AOMATT. Dr. Andrew Brown, Senior Director of SPIE, sent a letter of congratulations to the symposium. In his letter, Dr. Brown thanked all symposium chairs, conference chairs, and committee members for their leadership, and all authors and attendee for their contributions to make AOMATT 2016 a success. Dr. Brown also stated: "The vision of AOMATT is closely aligned with SPIE's mission to promote optics and photonics around the world. SPIE sponsors and co-sponsors technical conferences around the world and contribute millions of dollars every year in support of education and outreach programs, such as scholarships, travel grants, and other educational programs."

Finally, we would like to express our sincere appreciation to COS—The Chinese Optical Society (China), and IOE—Institute of Optics and Electronics, Chinese Academy of Sciences (China), for sponsoring and supporting AOMATT 2016. We want to thank all authors and participants as well volunteers for their contributions to the symposium and sharing their research with colleagues around the world.

We look forward to seeing everyone at AOMATT 2018.

Li Yang
