Volume 11481

Proceedings of SPIE 0277-786X, V. 11481

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Light in Nature VIII, edited by Vasudevan Lakshminarayanan, Katherine Creath,
Joseph A. Shaw, Proc. of SPIE Vol. 11481, 1148101 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2581657

Proc. of SPIE Vol. 11481 1148101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Light in Nature VIII*, edited by Vasudevan Lakshminarayanan, Katherine Creath, Joseph A. Shaw, Proceedings of SPIE Vol. 11481 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

VISION AND VISUAL OPTICS I

- 11481 03 **Vision in nature through GRIN media: smart optical design** [11481-1]
- 11481 04 **Color mixing: the history of the color disk** [11481-2]
- 11481 05 **Monocular foveal, parafoveal, and perifoveal accommodation response to random defocus step changes** [11481-3]
- 11481 06 **Hyperacuity thresholds and gap functions using an adaptive staircase method** [11481-4]

VISION AND VISUAL OPTICS II

- 11481 07 **Understanding the role of retinal cone photoreceptors in color perception, blur, and emmetropization** [11481-5]
- 11481 08 **Comparative assessment of brain activity during depth perception of stereoscopic and volumetric images** [11481-6]

NATURE AND EFFECTS OF LIGHT

- 11481 0A **Are there any photons in the dark fringes of double slit experiment?** [11481-8]
- 11481 0B **The Mach-Zehnder interferometer and photon dualism** [11481-15]

COLOR AND LIGHT IN NATURE

- 11481 0D **Observing glories and cloudbows from an airplane** [11481-10]
- 11481 0E **Astronomical events and how to photograph them** [11481-11]

OPTICAL STRUCTURES FROM NATURE

11481 0G **UV scattering by pores in avian eggshells** [11481-13]

11481 0H **Diffraction from elastomeric replicas of Philippine weevil surface features** [11481-14]
