**Volume 11695**

Proceedings of SPIE 0277-786X, V. 11695

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High Contrast Metastructures X, edited by Connie J. Chang-Hasnain, Jonathan A. Fan,  
Weimin Zhou, Proceedings of SPIE Vol. 11695, 1169501 · © 2021 SPIE  
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596718

Proc. of SPIE Vol. 11695 1169501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Contrast Metastructures X*, edited by Connie J. Chang-Hasnain, Jonathan A. Fan, Weimin Zhou, Proceedings of SPIE Vol. 11695 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## PLANAR METASURFACE OPTICS I

---

11695 08      **Ultra-high figure-of-merit dielectric metasurface** [11695-4]

---

## ACTIVE METASTRUCTURES

---

11695 0P      **Wide-angle beam focusing with a tuning GeSbTe phase-change metalens** [11695-21]

11695 0U      **Development of thick epsilon-near-zero ITO metafilms for use in metastructure and metasurface devices** [11695-26]

---

## NOVEL RESONANT EFFECTS

---

11695 18      **Bound states in the continuum in silicon integrated photonic devices** [11695-40]

---

## METASURFACES AND IMAGING

---

11695 1G      **Design and optimized fabrication techniques for highly-efficient dielectric meta-optical airy beam generators** [11695-48]

---

## POLARIZATION AND CHIRALITY

---

11695 1M      **Chiroptical effect induced by achiral structures for full dimensional manipulation of optical waves** [11695-54]

---

## HIGH CONTRAST GRATINGS

---

11695 1N      **Suspended subwavelength gratings for optical processing and optomechanics (Invited Paper)** [11695-55]

11695 1P      **Silicon nitride based medium contrast gratings for generating longitudinally polarized resonant fields** [11695-57]
