Volume 11755

Proceedings of SPIE 0277-786X, V. 11755

Sensors and Systems for Space Applications XIV, edited by Genshe Chen,
Khanh D. Pham, Proc. of SPIE Vol. 11755, 1175501 · © 2021 SPIE
CCC code: 0277-786X/21/$21 · doi: 10.1117/12.2598643

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Sensors and Systems for Space Applications XIV*, edited by Genshe Chen, Khanh D. Pham, Proc. of SPIE 11755, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SPACE DOMAIN AWARENESS

11755 0A **An improving capability of angles-only initial orbit determination via Laguerre root finding technique** [11755-9]

11755 0B **Multisource AI scorecard table analysis of AMIGO** [11755-10]

11755 0C **Three-dimensional convolutional neural network (3D-CNN) for satellite behavior discovery** [11755-11]

11755 0D **Systems integration and environmental testing activities performed on the Space Exploration Synthetic Aperture Radar (SESAR)** [11755-12]

COMMUNICATION AND NETWORKING

11755 0I **A review of network topology inference methods** [11755-17]

ARTIFICIAL INTELLIGENCE/MACHINE LEARNING

11755 0K **Deep reinforcement learning based task scheduling scheme in mobile edge computing network** [11755-19]

11755 0L **Task assignment in mobile edge computing networks: a deep reinforcement learning approach** [11755-20]

11755 0M **CriPI: an efficient critical pixels identification algorithm for fast one-pixel attacks** [11755-21]

11755 0O **Smart robot-enabled remaining useful life prediction and maintenance optimization for complex structures using artificial intelligence and machine learning** [11755-23]

SPACE PLAYLOAD, THRUST AND INFORMATION PROCESSING

11755 0P **Hardening GEO missile warning satellites against thermal jamming by out-of-band airborne lasers** [11755-24]

11755 0Q **Space weathering of solar array coverglasses** [11755-25]

11755 0R **An exploratory study for the use of used nuclear fuel in ion thrusters** [11755-26]

11755 0S **Application specific integrated circuit (ASIC) with low power digitizer (ADC) for space imaging applications** [11755-27]

11755 0T **Development of a second-order sliding innovation filter for an aerospace system** [11755-28]

11755 0U **A comparison of sigma-point Kalman filters on an aerospace actuator** [11755-29]

POSTER SESSION

11755 0V **Parallel computation of CRC-code on an FPGA** [11755-30]

11755 0W **Satellite image processing based on percolation for physicochemical analysis of soil cover of industrial waste facilities** [11755-31]
