

PROCEEDINGS OF SPIE

18th International Symposium on Medical Information Processing and Analysis

**Jorge Brieva
Pamela Guevara
Natasha Lepore
Marius G. Linguraru
Letícia Rittner
Eduardo Romero Castro**
Editors

**9–11 November 2022
Valparaíso, Chile**

Organized by
SIPAIM Foundation
Advanced Center for Electrical and Electronic Engineering (Chile)

Sponsored by
Advanced Center for Electrical and Electronic Engineering (Chile) · Universidad de Concepción (Chile)
Synopsis (Chile) · Millennium Institute for Intelligent Healthcare Engineering (Chile)
Voxel Health Care (United States)

Collaborators
Universidad Técnica Federico Santa María (Chile) · Universidad de Concepción (Chile) · Pontificia Universidad Católica de Chile (Chile) · Universidad de Valparaíso (Chile)

Cosponsored and Published by
SPIE

Volume 12567

Proceedings of SPIE 0277-786X, V. 12567

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

18th International Symposium on Medical Information Processing and Analysis, edited by Jorge Brieva, Pamela Guevara, Natasha Lepore, Marius G. Linguraru, Letícia Rittner, Eduardo Romero Castro,
Proc. of SPIE Vol. 12567, 1256701 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.2673983

Proc. of SPIE Vol. 12567 1256701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *18th International Symposium on Medical Information Processing and Analysis*, edited by Jorge Brieva, Pamela Guevara, Natasha Lepore, Marius G. Linguraru, Leticia Rittner, Eduardo Romero Castro, Proc. of SPIE 12567, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committees*

SESSION 1 GAIT AND DIGITAL PATHOLOGY

- 12567 02 **Unsupervised white blood cell characterization in the latent space of a variational autoencoder** [12567-13]
- 12567 03 **Bridging radiomics to tumor immune microenvironment assessment in clear cell renal cell carcinoma** [12567-2]
- 12567 04 **Muscle coactivation during gait after percutaneous repair of Achilles tendon: a case report** [12567-23]
- 12567 05 **Movements acquisition based on the Archimedean spiral test using leap motion controller** [12567-26]
- 12567 06 **Detecting Parkinson disease features with walking activity data** [12567-47]

SESSION 2 DEEP LEARNING

- 12567 07 **Automatic tooth segmentation from 3D dental model using deep learning: a quantitative analysis of what can be learnt from a single 3D dental model** [12567-1]
- 12567 08 **The transfer learning gap: quantifying transfer learning in a medical image case** [12567-34]
- 12567 09 **A deep learning model for brain vessel segmentation in 3DRA with arteriovenous malformations** [12567-28]
- 12567 0A **Learning optimal white matter tract representations from tractography using a deep generative model for population analyses** [12567-48]
- 12567 0B **Automatic segmentation of brain tumor in multi-contrast magnetic resonance using deep neural network** [12567-55]
- 12567 0C **Predicting dementia severity by merging anatomical and diffusion MRI with deep 3D convolutional neural networks** [12567-7]

SESSION 3 BODY IMAGING I

- 12567 0D **Self-supervised equivariant regularization reconciles multiple-instance learning: joint referable diabetic retinopathy classification and lesion segmentation** [12567-16]

12567 OE	Body location embedded 3D U-Net (BLE-U-Net) for ovarian cancer ascites segmentation on CT scans [12567-18]
12567 OF	Effects and methodology for grid subdivision of CT-based texture for unsupervised clustering [12567-42]
12567 OG	Contrast-Enhanced UltraSound (CEUS)-based characterization solid renal masses: a role for quantitative imaging approaches [12567-53]
12567 OH	CEM radiomics for distinguishing lesion from background parenchymal enhancement in patients with invasive breast cancer [12567-54]
12567 OI	Multi-platform fractal dimension analysis of renal masses from multiphase contrast-enhanced computed tomography as markers for tumor subtyping [12567-56]

SESSION 4 BRAIN IMAGING I

12567 OJ	Fiber bundles simulator using exponential curves to validate fiber clustering algorithms [12567-21]
12567 OK	A synthetic normative template for Parkinson's disease studies using structural and neuromelanin-sensitive magnetic resonance imaging [12567-32]
12567 OL	Group-wise cortical parcellation based on structural connectivity and hierarchical clustering [12567-40]
12567 OM	Can incomplete silver standard labels improve performance of DTI-based volumetric segmentation of the corpus callosum? [12567-52]
12567 ON	Superficial white matter shape characterization using hierarchical clustering and a multi-subject bundle atlas [12567-9]

SESSION 5 BODY AND BRAIN IMAGING

12567 OO	Building brain tumor segmentation networks with user-assisted filter estimation and selection [12567-15]
12567 OP	A ResNet is all you need: modeling a strong baseline for detecting referable diabetic retinopathy in fundus images [12567-24]
12567 OQ	VENTSEG: efficient open source framework for ventricular segmentation [12567-30]
12567 OR	Assessing coarse-to-fine deep learning models for optic disc and cup segmentation in fundus images [12567-36]
12567 OS	Changes in 3D radiomic texture descriptors in Alzheimer's disease stages [12567-49]

SESSION 6 E-HEALTH AND AI

- 12567 OT **Towards breastfeeding self-efficacy and postpartum depression estimation based on analysis of free-speech interviews through natural language processing** [12567-25]
- 12567 OU **Development of multiscale 3D residual U-Net to segment edematous adipose tissue by leveraging annotations from non-edematous adipose tissue** [12567-3]
- 12567 OV **Assessment of panoramic ultrasound reconstruction imaging using telemedicine equipment: a phantom experiment** [12567-33]
- 12567 OW **Machine learning-based prediction of diabetes risk by combining exposome and electrocardiographic predictors** [12567-35]
- 12567 OX **A named entity recognition framework using transformers to identify relevant clinical findings from mammographic radiological reports** [12567-46]

SESSION 7 ULTRASOUND

- 12567 OY **Qualitative and quantitative comparison of simulated ultrasound images generated by delay-and-sum and minimum variance techniques** [12567-29]
- 12567 OZ **Development of an acquisition system to monitoring asynchronous tele-ultrasound for lung patients** [12567-37]
- 12567 10 **From single-visit to multi-visit image-based models: single-visit models are enough to predict obstructive hydronephrosis** [12567-43]
- 12567 11 **Monitoring of lung ultrasound acquisition using volume sweep imaging protocol** [12567-44]
- 12567 12 **Tissue characterization of renal masses using Nakagami-modeling of ultrasound-based texture** [12567-50]
- 12567 13 **Automatic detection of lung ultrasound artifacts using a deep neural networks approach** [12567-59]

SESSION 8 BIOSIGNALS I

- 12567 14 **Detection of muscle activations by surface electromyography in patients with dysphagia** [12567-11]
- 12567 15 **Correntropy-based linear prediction for voice inverse filtering** [12567-20]
- 12567 16 **Assessing phoneme distribution for speech modeling** [12567-31]
- 12567 17 **High-density electromyography as a method for estimating laryngeal muscle activity: a preliminary study** [12567-41]

SESSION 9 BIOSIGNALS II

- 12567 18 **Early processing of unattended emotional faces increases the brain response to attended emotional expressions: an SSVEP study** [12567-10]
- 12567 19 **An automatic method for detection of evoked events in the brain during spinal cord stimulation** [12567-19]
- 12567 1A **Seizure detection by analyzing the number of channels selected by cross-correlation using TUH EEG seizure corpus** [12567-38]
- 12567 1B **Beyond global synchrony: equivalence between Kuramoto oscillators and Wilson-Cowan model for large-scale brain networks** [12567-39]
- 12567 1C **Imputing missing electroencephalography data using graph signal processing** [12567-8]

SESSION 10 BIOSIGNALS III

- 12567 1D **Source separation for single-channel thoracic cardio-respiratory sounds applying Non-negative Matrix Factorization (NMF) using a focused strategy on heart sound positions** [12567-17]
- 12567 1E **Constrained extended Kalman filter for improving Bayesian inference of vocal function from laryngeal high-speed videoendoscopy** [12567-22]
- 12567 1F **A simulation study to compare shear wave speed estimators of the reverberant shear wave elastography approach** [12567-58]
- 12567 1G **Authentication of medical images through a hybrid watermarking method based on Hermite-Jigsaw-SVD** [12567-6]

SESSION 11 BIOMEDICAL IMAGING: VIRTUAL SESSION

- 12567 1H **Predicting individual brain MRIs at any age using style encoding generative adversarial networks** [12567-12]
- 12567 1I **Modeling of the major temporal arcade using genetic algorithms and orthogonal polynomials** [12567-4]
- 12567 1J **Deep semi-supervised and self-supervised learning for diabetic retinopathy detection** [12567-5]
- 12567 1K **NEC-NET: segmentation and feature extraction network for the neurocranium in early childhood** [12567-51]
- 12567 1L **Evaluation of transfer learning methods for detecting Alzheimer's disease with brain MRI** [12567-60]

12567 1M **Design and construction of a pulmonary auscultation system as a support tool in the objective respiratory diseases diagnosis [12567-61]**

Conference Committees

Conference Chair

Pamela Guevara, Universidad de Concepción (Chile)

Steering Committee

Jorge Brieva, Universidad Panamericana (México)

Natasha Lepore, Children's Hospital Los Angeles (United States), and
University of Southern California (United States)

Marius G. Lingurar, Children's National Health System (United States)

Letícia Rittner, University of Campinas (Brazil)

Eduardo Romero Castro, Universidad Nacional de Colombia (Colombia)

Local Committee

Valeria Fernández, Advanced Center for Electrical and Electronic
Engineering (Chile)

Carolina Iturriaga, Advanced Center for Electrical and Electronic
Engineering (Chile)

José Manuel Rojas, Advanced Center for Electrical and Electronic
Engineering (Chile)

Monina Vásquez, Advanced Center for Electrical and Electronic
Engineering (Chile)

Pablo Vega, Universidad de Valparaíso (Chile)

Lucía Zepeda, Advanced Center for Electrical and Electronic
Engineering (Chile)

Ximena Zura, Advanced Center for Electrical and Electronic Engineering
(Chile)

Organizing Committee

Jully González, SIPAIM Foundation (Colombia)

Leonel Medina, Universidad de Santiago (Chile)

Esteban Pino, Universidad de Concepción (Chile)

Claudia Prieto, Universidad Católica de Chile (Chile)

Claudio Román, Universidad de Valparaíso (Chile)

Alejandro Weinstein, Universidad de Valparaíso (Chile)

Grace Whitaker, Universidad de Valparaíso (Chile)

Matías Zañartu, Universidad Federico Santa María (Chile)

Program Committee

Jorge Briefa, Universidad Panamericana (México)
Pamela Guevara, Universidad de Concepción (Chile)
Natasha Lepore, Children's Hospital Los Angeles (United States), and
University of Southern California (United States)
Marius G. Linguraru, Children's National Health System (United States)
Letícia Rittner, University of Campinas (Brazil)
Eduardo Romero Castro, Universidad Nacional de Colombia (Colombia)

Reviewers

Javier Adur, Universidad Nacional de Entre Ríos (Argentina)
Fernando Arambula, Universidad Nacional Autónoma de México
(México)
Amauri Assef, Universidade Tecnológica Federal do Paraná (Brazil)
Romis Attux, University of Campinas (Brazil)
Marc-Emmanuel Bellemare, Aix-Marseille Université (France)
Felipe Andres Bello, Universidad de Santiago (Chile)
Antonio Bravo, Universidad Nacional Experimental del Táchira
(Venezuela)
Caroline Brun, University of Pennsylvania (United States)
Paola Caprile, Pontificia Universidad Católica de Chile (Chile)
George Cardoso, University of Sao Paulo (Brazil)
Marco Antonio Carvalho, University of Campinas (Brazil)
Victor Castañeda, Universidad de Chile (Chile)
Germán Castellanos, Universidad Nacional de Colombia (Colombia)
Violeta Chang, Universidad de Santiago (Chile)
Clarimar Coelho, Pontificia Universidade Católica de Goiás (Brazil)
Germán Corredor, Case Western Reserve University (United States)
Marly Costa, Federal University of Amazonas (Brazil)
Iver Cristi-Sánchez, Universidad de Valparaíso (Chile)
Angel Alfonso Cruz, Universidad de los Llanos (Colombia)
Jose Delpiano, University of the Andes (Colombia)
Jairo Espinosa, Universidad Nacional de Colombia (Colombia)
Ricardo Espinosa, Universidad ECCI (Colombia)
Rosa Figueroa, Universidad de Concepción (Chile)
Franklin Flores, University of Maringá (Brazil)
Niharika Gajawelli, University of Southern California (United States)
Diana Giraldo, Universidad Nacional de Colombia (Colombia)
Fabio González, Universidad Nacional de Colombia (Colombia)
Darryl Hwang, University of Southern California (United States)
Marcela Iregui, Universidad Militar Nueva Granada (Colombia)
Joaquim Miguel Maia, Universidade Tecnológica Federal do Paraná
(Brazil)
Antoine Manzanera, ENSTA Paris Tech (France)
Fabio Martínez, Universidad Industrial de Santander (Colombia)
Leonel Medina, Universidad de Santiago (Chile)

Domingo Mery, Universidad Católica de Chile (Chile)
Jean-Gabriel Minonzio, Universidad de Valparaíso (Chile)
Ernesto Moya Albor, Universidad Panamericana (México)
Sarah Negreiros, Federal University of Ouro Preto (Brazil)
José Orlando, National Scientific and Technical Research Council,
 CONICET (Argentina)
Esteban Pino, Universidad de Concepción (Chile)
Hiram Ponce, Universidad Panamericana (México)
Prateek Prasanna, Stony Brook University (United States)
María Rodríguez-Fernández, IIBM-UC (Brazil)
Gonzalo Rojas, Clínica las Condes (Chile)
Eduardo Romero Castro, Universidad Nacional de Colombia (Colombia)
David Romo, Universidad Industrial de Santander (Colombia)
Andrea Rueda, Pontificia Universidad Javeriana (Colombia)
Carolina Saavedra, Universidad de Valparaíso (Chile)
Francisco Sahli, Pontificia Universidad Católica de Chile (Chile)
Rodrigo Salas, Pontificia Universidad Católica de Chile (Chile)
João Salinet, Universidade Federal do ABC (Brazil)
Cristina Santa Marta, National Distance Education University (Spain)
Armin Schwartzman, University of California (United States)
Julio Sotelo, Universidad de Valparaíso (Chile)
Felix Thomsen, Universidad Nacional del Sur (Argentina)
Oscar Valencia, Universidad de los Andes (Colombia)
Manuel Villalobos, Universidad de Santiago de Chile (Chile)
Julio Villalón, University of Southern California (United States)
Satish Viswanath, Case Western Reserve University (United States)
Roza Vlasova, University of North Carolina at Chapel Hill (United States)
Alejandro Weinstein, Universidad de Valparaíso (Chile)

Session Chairs

- 1 Gait and Digital Pathology
Darryl Hwang, University of Southern California (United States)

- 2 Deep Learning
Rodrigo Salas, Pontificia Universidad Católica de Chile (Chile)

- 3 Body Imaging I
Steren Chabert, Universidad de Valparaíso (Chile)

- 4 Brain Imaging I
Wael El-Deredy, Universidad de Valparaíso (Chile)

- 5 Body and Brain Imaging
Julio Sotelo, Universidad de Valparaíso (Chile)

- 6 E-health and AI
Darryl Hwang, University of Southern California (United States)
- 7 Ultrasound
Bino Varghese, University of Southern California (United States)
- 8 Biosignals I
Alejandro Weinstein, Universidad de Valparaíso (Chile)
- 9 Biosignals II
Matías Zañartu, Universidad Federico Santa María (Chile)
- 10 Biosignals III
Alejandro Weinstein, Universidad de Valparaíso (Chile)
- 11 Biomedical Imaging: Virtual Session
Leonel Medina, Universidad de Santiago (Chile)
