SPIE

Volume 12952

Proceedings of SPIE 0277-786X, V. 12952

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

NDE 4.0, Predictive Maintenance, Communication, and Energy Systems: The Digital Transformation of NDE II, edited by
Christopher Niezrecki, Saman Farhangdoust, Norbert G. Meyendorf, Proc. of SPIE Vol. 12952, 1295201
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3033652

Proc. of SPIE Vol. 12952 1295201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *NDE 4.0, Predictive Maintenance, Communication, and Energy Systems: The Digital Transformation of NDE II*, edited by Christopher Niezrecki, Saman Farhangdoust, Norbert G. Meyendorf, Proc. of SPIE 12952, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 NDE 4.0: PREDICTIVE MAINTENANCE AND MONITORING

- 12952 02 **Considerations for supplier nondestructive evaluation qualification and certification for inspecting fracture critical parts [12952-2]**
- 12952 03 **Silicone sealant defect detection via 3D image reconstruction from multiple ultrasonic sensors [12952-3]**
- 12952 04 **Thick crack width calculating method using chalk-marks in low-contrast 2D images acquired during high-speed traveling [12952-4]**
- 12952 05 **Aeronautics failure: a prognostic methodology based on the physics of failure and statistical approaches for predictive maintenance [12952-6]**

SESSION 2 NDE 4.0 AND SHM OF ENERGY SYSTEMS I

- 12952 06 **Infrared-based point cloud reconstruction for heat loss detection in a virtual reality environment [12952-7]**
- 12952 07 **Efficient community building energy load forecasting through federated hypernetwork [12952-8]**
- 12952 08 **IoT acoustic sensor design and antenna selection for a wind turbine structural health monitoring system [12952-10]**
- 12952 09 **Towards next-generation NDE: predictive analysis of pipeline integrity using machine learning [12952-11]**

SESSION 3 NDE 4.0 AND SHM OF ENERGY SYSTEMS II

- 12952 0A **Reconstruction of 3-D pipeline corrosion defect profile from MFL signals with deep learning approach [12952-12]**
- 12952 0B **Federated autoML learning for community building energy prediction [12952-14]**

Conference Committee

Symposium Chairs

Haiying Huang, The University of Texas at Arlington (United States)
Hani E. Naguib, University of Toronto (Canada)

Symposium Co-chairs

Asha J. Hall, DEVCOM Army Research Laboratory (United States)
Jae-Hung Han, KAIST (Korea, Republic of)

Conference Chair

Christopher Niezrecki, University of Massachusetts Lowell
(United States)

Conference Co-chairs

Saman Farhangdoust, Stanford University (United States)
Norbert G. Meyendorf, Fraunhofer IKTS (Germany) and University of
Dayton (United States)

Conference Program Committee

Ali Abdul-Aziz, Kent State University (United States)
Nicolas P. Avdelidis, Cranfield University (United Kingdom)
Nasrin Azari, Floodlight Software (United States)
Frank Brueckner, Fraunhofer IWS (Germany)
Patrick Hon Man Chan, Armstrong Flight Research Center
(United States)
Kerrie Gath, Consultant (United States)
Sven Gondrom-Linke, Volume Graphics GmbH (Germany)
Nathan Ida, The University of Akron (United States)
Robin James, General Motors Company (United States)
Daniel Kanzler, Applied Validation (Germany)
Jung-Ryul Lee, KAIST (Korea, Republic of)
Zheng Liu, The University of British Columbia Okanagan (Canada)
Theodore E. Matikas, University of Ioannina (Greece)
Michele Meo, University of Southampton (United Kingdom)
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Martin Oppermann, TU Dresden, Centre of Microtechnical
Manufacturing (Germany)
Gyuhae Park, Chonnam National University (Korea, Republic of)
Stefano Sfarra, Università degli Studi dell'Aquila (Italy)

Christian Wunderlich, Fraunhofer IKTS (Germany)
Yuan Yao, National Tsing Hua University (Taiwan)
Dong-Jin Yoon, Korea Research Institute of Standards and Science
(Korea, Republic of)
