Volume 13039

Proceedings of SPIE 0277-786X, V. 13039

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Automatic Target Recognition XXXIV, edited by Kenny Chen, Riad I. Hammoud, Timothy L. Overman,
Proc. of SPIE Vol. 13039, 1303901 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3037151

Proc. of SPIE Vol. 13039 1303901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Automatic Target Recognition XXXIV*, edited by Kenny Chen, Riad I. Hammoud, Timothy L. Overman, Proc. of SPIE 13039, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MACHINE LEARNING FOR AUTOMATIC TARGET RECOGNITION I: JOINT SESSION WITH CONFERENCES 13036 AND 13039

- 13039 03 **Multi-objective optimization with homotopy-based strategies for enhanced multimodal automatic target recognition models (Best Student Paper Award)** [13039-2]
- 13039 05 **Black box phase-based adversarial attacks on image classifiers** [13039-4]
- 13039 06 **Tracing the evolution: a review of dictionary-learning in ATR systems** [13039-5]

ELECTRO-OPTICAL AND INFRARED DETECTION AND TRACKING I

- 13039 07 **Transitioning algorithms from IR imagery to future event-based systems** [13039-7]
- 13039 08 **Real-time object detection and tracking using flash LiDAR imagery** [13039-8]
- 13039 09 **Utilizing grounded SAM for self-supervised frugal camouflaged human detection** [13039-9]

RADAR FREQUENCY AND SYNTHETIC APERTURE RADAR AUTOMATIC TARGET RECOGNITION I

- 13039 0A **Stepped-frequency radar target recognition with random forests** [13039-11]
- 13039 0B **Characterizing open-set ATR methods to detect out of distribution data for a maritime object classifier in space-based electro optical imagery** [13039-12]

ELECTRO-OPTICAL AND INFRARED DETECTION AND TRACKING II

- 13039 0D **Situational awareness and state estimation tools for search and localize missions with stationary targets in formation** [13039-17]
- 13039 0E **Segmentation-based low-resolution spatial tracker for video** [13039-18]

MACHINE LEARNING FOR AUTOMATIC TARGET RECOGNITION II

13039 OH **Quantum classification for synthetic aperture radar (Best Student Paper Award)** [13039-21]

RADAR FREQUENCY AND SYNTHETIC APERTURE RADAR AUTOMATIC TARGET RECOGNITION II

13039 OI **Uncertainty-informed SAR image classification with Bayesian neural networks** [13039-22]

13039 OJ **Unsupervised SAR representation learning improves classification performance** [13039-23]

13039 OK **Benchmarking transferability metrics for SAR ATR** [13039-24]

13039 OL **SAR ATR analysis and implications for learning** [13039-25]

ARTIFICIAL INTELLIGENCE AND DEEP LEARNING: JOINT SESSION WITH CONFERENCES 13039 AND 13046

13039 OM **Object detection for infrared ground to ground applications on the edge** [13039-27]

13039 ON **Investigations into out-of-domain performance of a two-step ATR based on a fusion of thermal and environmental data** [13039-28]

13039 OO **Infrared collects of scale models for automatic target recognition** [13039-29]

POSTER SESSION

13039 OP **A comparative analysis of optical sensor artifacts across neural network-based ATR algorithms** [13039-26]

Conference Committee

Symposium Chairs

Tien Pham, The MITRE Corporation (United States)
Douglas R. Droege, L3Harris Technologies, Inc. (United States)

Symposium Co-chairs

Ann Marie Raynal, Sandia National Laboratories (United States)
Ravi Ravichandran, BAE Systems (United States)

Program Track Chair

David Messinger, Rochester Institute of Technology (United States)

Conference Chairs

Kenny Chen, Lockheed Martin Missiles and Fire Control (United States)
Riad I. Hammoud, PlusAI, Inc. (United States)
Timothy L. Overman, Prime Solutions Group, Inc. (United States)

Conference Program Committee

Leon Cohen, Hunter College (United States)
Frederick D. Garber, Wright State University (United States)
Izidor Gertner, The City College of New York (United States)
Megan King, U.S. Army Combat Capabilities Development Command (United States)
Bing Li, Lockheed Martin Corporation (United States)
Jason P. Luck, Lockheed Martin Missiles and Fire Control (United States)
Abhijit Mahalanobis, The University of Arizona (United States)
Asif Mehmood, Joint Artificial Intelligence Center (United States)
Olga Mendoza-Schrock, Air Force Research Laboratory (United States)
Robert R. Muise, University of Central Florida (United States)
Nasser M. Nasrabadi, West Virginia University (United States)
Lakshmanan Nataraj, Mayachitra, Inc. (United States)
Anurag Paul, PlusAI, Inc. (United States)
Saurabh Prasad, University of Houston (United States)
Vahid R. Riasati, California State University, Northridge (United States)
Firooz A. Sadjadi, Emerging Concepts Laboratory LLC (United States)
Inderjot Singh Saggu, PlusAI, Inc. (United States)
Cem Safak Sahin, Systems & Technology Research (United States)

Angel D. Sappa, ESPOLE Polytechnic University (Ecuador), Vintra Inc. (United States), and Universitat Autònoma de Barcelona (Spain)
Jason R. Stack, Office of Naval Research (United States)
Michael Teutsch, HENSOLDT Optronics GmbH (Germany)
Alan J. Van Nevel, Naval Postgraduate School (United States)
Vincent J. Velten, Air Force Research Laboratory (United States)
Donald Waagen, Air Force Research Laboratory (United States)
Edmund Zelnio, Air Force Research Laboratory (United States)
