Volume 9591

Proceedings of SPIE 0277-786X, V. 9591

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Target Diagnostics Physics and Engineering for Inertial Confinement Fusion IV,
edited by Jeffrey A. Koch, Gary P. Grim, Proc. of SPIE Vol. 9591, 959101
© 2015 SPIE · CCC code: 0277-786X/15/$18 · doi: 10.1117/12.2218290

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 TARGET DIAGNOSTICS: JOINT SESSION WITH CONFERENCES 9591 AND 9595

9591 02 **Fundamental performance differences of CMOS and CCD imagers: part VI (Invited Paper)** [9591-1]

9591 03 **Complete time-resolved polarimetry of scattered light at the National Ignition Facility (Invited Paper)** [9591-2]

SESSION 2 X-RAY AND OPTICAL SYSTEMS I

9591 04 **Upgrades to the VISAR-streaked optical pyrometer (SOP) system on NIF** [9591-3]

9591 08 **Mirrored low-energy channel for the MiniXRD** [9591-7]

SESSION 3 OPTICAL SYSTEMS

9591 09 **Disposable blast shields for use on NIF imaging diagnostics** [9591-8]

9591 0A **3ω beam-timing diagnostic for the OMEGA laser facility** [9591-9]

9591 0B **Digitizer architecture analysis for target diagnostics on the National Ignition Facility** [9591-10]

9591 0C **Materials characterization of irradiated spectralon from the NIF target chamber** [9591-11]

9591 0D **Gated photocathode design for the P510 electron tube used in the National Ignition Facility (NIF) optical streak cameras (Invited Paper)** [9591-12]

SESSION 4 NUCLEAR SYSTEMS

9591 0E **Multi-axis neutron imaging at the National Ignition Facility (Invited Paper)** [9591-13]

9591 0F **Upgrades to the Radiochemistry Analysis of Gas Samples (RAGS) diagnostic at the National Ignition Facility** [9591-14]

9591 0G **Vast Area Detection for Experimental Radiochemistry (VADER) at the National Ignition Facility** [9591-15]

9591 0H **Implementation of an enhanced, permanently installed neutron activation diagnostic hardware for NIF** [9591-16]

SESSION 5 X-RAY SYSTEMS

9591 0I **Opacity spectrometer design for opacity measurements at the National Ignition Facility (Invited Paper)** [9591-17]

9591 0J **Calibration results for first NIF Kirkpatrick-Baez microscope** [9591-18]

9591 0K **Determining the diffraction properties of a cylindrically bent KAP(001) crystal from 1 to 5 keV** [9591-19]

9591 0L **Optimizing the input and output transmission lines that gate the microchannel plate in a high-speed framing camera** [9591-20]

SESSION 6 X-RAY AND OPTICAL SYSTEMS II

9591 0N **Shot-time photography at the National Ignition Facility** [9591-22]

9591 0O **Precision fabrication of large area silicon-based geometrically enhanced x-ray photocathodes using plasma etching** [9591-23]

9591 0P **An overview of the Ultrafast X-ray Imager (UXI) program at Sandia Labs** [9591-24]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chairs

Ali M. Khounsary, X-ray Optics, Inc. (United States) and Illinois Institute of Technology (United States)
Ralph B. James, Brookhaven National Laboratory (United States)

Conference Chairs

Jeffrey A. Koch, National Security Technologies, LLC (United States)
Gary P. Grim, Lawrence Livermore National Laboratory (United States)

Conference Program Committee

W. Jack Armstrong, University of Rochester (United States)
Perry M. Bell, Lawrence Livermore National Laboratory (United States)
David K. Bradley, Lawrence Livermore National Laboratory (United States)
Frank E. Merrill, Los Alamos National Laboratory (United States)
T. Craig Sangster, University of Rochester (United States)

Session Chairs

1 Target Diagnostics: Joint Session with Conferences 9591 and 9595
Gary P. Grim, Lawrence Livermore National Laboratory (United States)

2 X-Ray and Optical Systems I
Jeffrey A. Koch, National Security Technologies, LLC (United States)

3 Optical Systems
Joseph R. Kimbrough, Lawrence Livermore National Laboratory (United States)

4 Nuclear Systems
Philip S. Datte, Lawrence Livermore National Laboratory (United States)

5 X-Ray Systems
Arthur Carpenter, Lawrence Livermore National Laboratory (United States)

6 X-Ray and Optical Systems II
Donald R. Jedlovec, Lawrence Livermore National Laboratory (United States)
